Marketing

Leadership

Product Design

## PROJECTS

### Client Mehendi Website

- Made with Next js, learnt SEO, Google Search Console, improved page ranking, fully responsive design, added google analytics and running google ads campaign for the business. Optimized images, lazy loading, swipe detection, image view and zoom. Used nodemailer, fast2sms, twilio service on node API to send messages on contact form.
- github - <https://github.com/Rahul987725800/subhash-mehndi>
- app - <https://www.subhashguptamehndi.in/home>

### Algo Visualizer

- Made a React project to visualize different algorithms, sorting, searching, recursion, graphs bfs, dfs, topological sort, dijkstra, heapsort, backtracking.
- github - <https://github.com/Rahul987725800/algo-visualizer>
- app - <https://algo-visualizer-123.netlify.app/>

### Facebook-clone

- used nodejs, apollo-server graphql api and mongoose to build crud, authentication and authorization using jwt tokens, cloudinary for image upload, web sockets for chat, build facebook UI with dark and light themes, animations in react.
- github frontend - <https://github.com/Rahul987725800/facebook-web>
- github backend - <https://github.com/Rahul987725800/facebook-server>
- app - <https://facebook-web.netlify.app/>

### PDF Reader with Dictionary

- Used React and Firebase, applied concepts of debouncing, dom events, responsive design, lazy loading, fetching data from api.
- github - <https://github.com/Rahul987725800/pdf-reader-react>
- app - <https://pdf-reader-react.netlify.app/>

### Burger Point

- A burger ordering app, managed custom form input and validation, editing, responsive design. Applied longest common substring algorithm for address matching.
- github - <https://github.com/Rahul987725800/burger-point>
- app - <https://burger-point.netlify.app/>

### Nagarro Clone

- Used React, learnt complex animations with react-transition-group, how to plan UI, spaced design
- github - <https://github.com/Rahul987725800/nagarro-clone>
- app - <https://nagarro-clone.vercel.app/>
